EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Elias (Reg. No. 48,806) on 3/30/2005.

The application has been amended as follows:

In claim 12, line 1, replace "claim 11" with --claim 9--.

In claim 13, line 1, replace "claim 11" with --claim 9--.

In claim 14, line 1, replace "claim 11" with --claim 9--.

REASONS FOR ALLOWANCE

Claims 1-10 and 12-36 are allowed.

The following is an examiner's statement of reasons for allowance:

Per amended independent claims 1, 28, and 29, the Examiner finds the added limitations in the amendment filed 1/28/2005 overcome the teaching of the prior art. Specifically, that the prior art does not teach or reasonably suggest in combination the wheel-identification-data registration assisting apparatus as claimed including the relative-movement device operable to move the signal transmitting portion and the corresponding one wheel-side device relative to each other and wherein the signal transmitting portion is provided outside the vehicle in the system as now claimed. See also the applicant's arguments on pages 18-19 of the reply filed 1/28/2005.

Art Unit: 3661

Claims 2-10, 12-27, and 30-36 serve to further define the invention of claims 1, 28, and 29 over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The references made of record and not relied upon are considered pertinent to applicant's disclosure. Ide (US 20030179082A1) teaches a vehicle wheel information obtaining apparatus and wheel information processing apparatus.
